## Highly accurate and efficient total stations

The R20 range is composed of 3 versions, the R20 1000 m model with 2" angular accuracy, the R20 1000 m model with 1" angular accuracy and the R20 600 m model with 2" angular accuracy.

The three models offer optimum performances up to 5000 m with prism and 1000 m or 600 m reflectorless.

The entire R20 range is equipped with a high-performance, illuminated reticle telescope that provides the best quality of observation, whatever the environmental conditions.

The programs on board of these models of total stations make them suitable for any work in construction, cadastral, mapping and staking, through a user-friendly interface.

Thanks to the presence of Bluetooth connection, it is possible to connect an external controller, giving the possibility to use a customized field software.

# R20 - Main Features

## LIMITLESS DISTANCE MEASUREMENTS

By using a digital phase laser ranging technology, R20 guarantees high accuracy measurements: 1000 m or 600 m (depending on the model) in reflectorless mode and up to 5000m using a single prism, with millimeter accuracy.

## FAST, ACCURATE, RELIABLE

Measuring distances with high angular accuracy make any job extremely cost effective and reliable. The wide range of application software allows to complete the Surveyor's tasks directly in the field.

## ONE DAY OF CONTINUOUS FIELD WORK

Thanks to the low power consumption circuit design R20 gives the opportunity to continuously work for more than 22 hours.

## TEMPERATURE PRESSURE SENSORS

Temperature and pressure changes have a negative impact on the accuracy of distance measurements. R20 monitors the changes and automatically adjusts the distance calculations.

### R20 Total Station

Precise, Efficient and Easy

STONEX  
cube

## R20

Highly accurate and efficient Total Stations

The R20 range is composed of 3 versions, the R20 1000 m model with 2" angular accuracy, the R20 1000 m model with 1" angular accuracy and the R20 600 m model with 2" angular accuracy. The three models offer optimum performance up to 3000 m with prism and 1000 m or 600 m reflectorless.

The entire R20 range is equipped with a high-performance, illuminated reticle telescope that provides the best quality of observation, whatever the environmental conditions.

The programs on board of these models of total stations make them suitable for any work in construction, cadastral, mapping and staking, through a user-friendly interface. Thanks to the presence of Bluetooth connection, it is possible to connect an external controller, giving the possibility to use a customized field software.

### R20

An easy and smart solution for your Survey

Whether the work is a basic survey or a stake out, R20 will always help you with a friendly interface and its intuitive field applications. The navigation menu drives the Surveyour into simple operations and the results are displayed in a clear way.

**LIMITLESS DISTANCE MEASUREMENTS**

By using a digital phase laser ranging technology, R20 guarantees high accuracy measurements: 1000 m or 600 m (depending on the model) in reflectorless mode and up to 3000 m using a single prism, with millimeter accuracy.

**FAST, ACCURATE, RELIABLE**

Measuring distances with high angular accuracy make any job extremely cost effective and reliable. The wide range of application software allows to complete the Surveyor's tasks directly in the field.

**ONE DAY OF CONTINUOUS FIELD WORK**

Thanks to the low power consumption circuit design, R20 gives the opportunity to continuously work for more than 22 hours.

**TEMPERATURE PRESSURE SENSORS**

Temperature and pressure changes have a negative impact on the accuracy of distance measurements. R20 monitors the changes and automatically adjusts the distance calculations.

**LOCK DRIVES & TRIGGER KEY**

Ergonomic clamps and knobs to make target collimation fast and accurate using both the hands. Start the measure using the trigger key located on the side of the instrument.

**COLOR DISPLAY**

R20 is equipped with 320x240 two color displays with well-designed icons which give a clear environment to the surveyor, even under full sun.

**EASY CONNECTIVITY**

Quick import & export of data through a USB dongle. A Bluetooth connection enables the R20 to communicate with a handheld device, giving the possibility to use a custom field software, such as Stonex Cube or a.

### Rotating Bracket for tripod

## R20 - Accessories

### Rotating Bracket for tripod

The bracket is positioned between the tripod and the total station, and on the side provides the support to install a controller. It is compatible with all the controller supports of the Stonex range (SH5A-UT10/UT12P -UT30/UT32-S70), and thanks to the ball adapter, it is possible to connect any other handheld that has a compatible RAM support available.

The bracket provides full 360-degree rotation to work at any angle.

It is made of black anodized aluminum, the metal adapter for the base of the total station and the RAM compatible ball adapter are included in the package.
